

DREW BROPHY

ARTIST STATEMENT

My paintings begin with ideas inspired directly from nature, the sun and surfing, because those are the things I love and dream about.

I am fascinated by nature and the idea that everything is connected in the entire Universe. Extensive studies of sacred geometry, physics and ancient cultures make their way into my work.

I first visualize the finished painting in my mind. Then I begin my ideas with loose sketches, and that's where I discover the best composition and design. I can see it finished before paint even hits the canvas.

My creations move quickly through me, so I enjoy working with a variety of mediums that allow me to paint quickly. I get various effects using different tools, brushes and paints. Using many mediums in one painting enables me to get desired colors, light and energy that I strive for in each piece.

People are most drawn to my vibrant colors and the powerful energy in my paintings. I strive to create movement and positive feelings in my art, because that's what makes people happy.

My paintings visually illustrate the message that everything is energy and that we are all connected in this Universe. I strive to help people to understand some of these complex concepts in physics, in an easy way.

The art achieves this by bringing together mathematics, ancient symbols and elements such as water, energy and vibration.

Though my paintings, I strive to share a visual understanding of the things I learn through my daily studies of physics and my nature-inspired lifestyle. It is all connected.

My ultimate message is that life is exciting and meant to be enjoyed. I wanted to inspire others to get out and enjoy nature, see its beauty and live their life now, as it was meant to be.
